

Maruwa announces the launch of Multifilar GPS and Iridium Antenna Modules

Through acquisition of the assets and technical knowhow of SARANTEL, MARUWA is creating a perfect synergy combining MARUWA materials technology with key personnel, excellent antenna knowhow, manufacturing equipment and processes from SARANTEL. To this powerful dielectric-loaded helical technology MARUWA is adding:

- World-leading materials technology (particularly in electro-ceramics).
- Diverse and deep production know-how.
- Proven Japanese quality control disciplines.
- Financial strength combined with management ambition.
- An international sales network.

Using this combination of scientific strengths MARUWA is building a new helical antenna series. These GPS, GNSS and handheld satellite terminal antennas will have higher quality and performance than ever before.
